---

PROFILE

Aspiring Full Stack Developer and third-year BICT (Hons) student specializing in Software Technology at the University of Sri Jayewardenepura. Skilled in building client and university projects using the **MERN stack and React Native**, with experience in backend integration, responsive UI design, and real-time features. Seeking an internship to apply and expand full-stack development expertise.

PROJECTS

SK Auto care website (MERN Stack | Client Project)   **Sep 2025 – Oct 2025**

- Developed a full-stack e-commerce website for a UAE client using the MERN stack, integrating Stripe payments and responsive UI. The platform supports **1,000+** parts from **15+** vehicle brands.

Travel Ceylon (MERN Stack | University Group Project)   **May 2025 – Aug 2025**

- Contributed as a Full Stack Developer to *TravelCeylon*, a MERN-based travel booking platform. Developed the **Stays page** with backend integration, enabling users to browse and filter over **500+ stay listings** across **50+ destinations** with responsive UI and seamless API connectivity.

Heart Attack Detector (React Native & WebSocket | IoT Project)   **Dec 2024 – Jan 2025**

- Built a React Native IoT health app using Node.js, Express, and WebSocket for real-time monitoring, with Expo Push Notifications for heart irregularity alerts.

Worked on 5+ team projects and solo projects involving MERN Stack, React native, and Python.

EDUCATION

Bachelor of Information and Communication Technology (BICT)   **2023 – 2027**

University of Sri Jayewardenepura (Homagama)

- Currently a 3rd Year undergraduate specializing in Software Technology.
- Completed coursework in Software Engineering, Database Systems, Web Development, Data structures and algorithms, Human Computer Interaction, OOP and Project Management.
